## HS<sup>®</sup> blue folder belts

### Increased efficiency for corrugated carton

Chiorino HS<sup>®</sup> blue belts are designed to offer **highest resistance to abrasion** and **increased production efficiency**. The thermoplastic TPU interply allows a quick splicing on site **minimizing downtime**.

Chiorino HS<sup>®</sup> blue belts are ideal for corrugated carton box folder-glueers and for any application where a high coefficient of friction is required.

| KEY FEATURES  | BENEFITS                                 |
|---|--|
| HS <sup>®</sup> elastomer high coefficient of friction        | ▶ <b>Highest folding accuracy</b>        |
| HS <sup>®</sup> elastomer excellent resistance to abrasion    | ▶ <b>Long service life</b>               |
| TPU Interply improves belt flexibility and folding capability | ▶ <b>Increased production efficiency</b> |
| TPU Interply allows a very quick finger joint                 | ▶ <b>Reduced downtime</b>                |

#### Textures

Chiorino HS<sup>®</sup> blue folder belts are available with different texture covers according to application and processing features.
